

SWEng Group 3 Enterprise

QA Self Assessment 2 ANALYSIS

This is the analysis document for how the group answered the 2nd self-assessment sheet questions.

How do you feel the project is going in terms of the whole Group's effort, in particular meeting the first Iteration deadline?

All but one of the group members were pleased with the overall output in terms of code/effort/documentation/finances. Some points raised:

- Deadline cramming due to poor time management, in particular the financial reports.
- Learning curve of android studio slowing down some group members.
- Lack of direction and work delegation towards the end of the term.
- Timesheets must be taken more seriously.

How do you feel the project is going in terms of your individual effort, in particular meeting the first Iteration deadline?

Most group members were happy although some felt they could be doing more work. In particular some group members who feel that they are weak programmers and leaned on more experienced coders for help.

Are you meeting the QA metrics that you set for the QA Manual? (if applicable)

Although some group members felt that some metrics were not able to be evaluated this early on in the project all others were happy with their progress towards the metrics.

Do you have any issues with how work is being carried out in the Group? If so, what are they and how would you like them resolved?

Work delegation has been lackluster, more 'aggressive' delegation of work and specific tasks will be carried out in the upcoming term.

Do you have any issues with how meetings are being carried out in the Group? If so, what are they?

Some group members felt that the meetings lacked direction and would often jump around topics/take too long to complete.

Do you have any further queries you would like to be brought up in a meeting?

No one wrote anything here.
