

Minutes for Meeting Number Eighteen [45 Minutes]

Agenda:

- Battle Plan
- Demonstration
- Programming Updates [Roundtable]
- Finance
- Programming Sessions
- HTML Tour
-

Battle Plan - The group leader [Marco] has updated the battle plan document and calculates that 25 days worth of work are left for the whole project; note this is a rough estimate. This follows the 'Critical Path' seen in the battle plan document.

Demonstration - The final presentation to be held by the group is on the 4th June; preparation will start on Friday 1st and continue over the weekend.

Finance - Jeremy has completed the timesheet analysis for the final report. The final report is due in on the 25th May, it must contain:

- Profit/Loss and Income vs cost over time
- Balance Sheet
- Cashflow week to week
- A 5 year forecast predicting the profitability of the app
- Sales income
- Dev time over the next 5 years
- Investment probabilities over the next 5 years
- Wages for the next 5 years- taking into account unused money from the current loan.
- Profit spikes
- Net Present ?
- Income from adverts - (Very difficult to find data)
- 5 year wage predictions taking into account group size

A meeting will be held on Tuesday between Miranda/Finance Manager and others.

Programming Roundtable - Most group members have only just started working again after the brief hiatus for revision. Alex B has completed the first version of the shopping list page within the app and demonstrated it for the group, some suggested improvements were made:

- Centre the Columns
- Remove the check icon from the final column
- Integrate the "add to shopping list" functionality using a universally available constraint.

Programming sessions will continue to be held in pt108. The instructional videos will be recorded on the evening of Monday 21st May.

HTML Tour - First iteration done, Marco has suggested to format it with a contents panel on the side similar to his own work.
