

# SWEng Group 3 Enterprise QA Self Assessment Sheet

Name: Jack Rookes

Role: Software Manager

## **How do you feel the project is going in terms of the whole Group's effort?**

I feel the project is going quite well so far. Everyone is putting in a lot of effort on their part. In general, I am impressed that all group members want to be a part of the development process and are eager to do some programming. It has made my job easier when teaching the group about things like Git and Java.

## **How do you feel the project is going in terms of your individual effort?**

Currently I feel OK about the effort I am putting into the project. Though I do think that sometimes I am not being as helpful or productive as I could be, especially when helping others with the programming.

**Do you think that you are meeting the QA metrics that you set for the QA Manual (if applicable)**

So far, I am keeping a track of what is being done with the development process through Trello. The time for producing and testing the code can tracked with Trello.

There have been bugs and issues with the code and they did get fixed quickly without the need to raise issues on GitHub.

I have been looking over the code made by others and in some cases fixed the code. No merge requests have been made yet, but when there is any I will check the code and test it before merging it with the master branch.

**Do you have any issues with how work is being carried out in the Group? If so, what are they?**

N/A

**Do you have any issues with how meetings are being carried out in the Group? If so, what are they?**

N/A

**Do you have any further queries you would like to be brought up in a meeting?**

N/A
