Information: Overhead Recovery Rate Analysis	Page 10
Summary	Page 11
Appendices	Pages 12 Onwards.

Foreword:

It should be noted that the business plan is still pending final possible adjustments for labour hours from the Project Manager (however any adjustments will not result in a change in the total labour hours, only how these hours are distributed over the weeks, which should have minimal impact on the weekly closing balance forecast so far.

The reason why the Financial Business Plan has been resubmitted with a new estimated loan is due to an under-estimation of labour hours by the Project Manager, which has now been corrected in collaboration with all group members.

Introduction:

This document will outline the financial plan for our company, including a cash flow forecast for the development phase of our product as well as a Gantt chart indicating how many hours of labour occur each week.

In this document our product will also be explained, and we will provide analysis of our costs in order to aid the financial advisor with their financial decision.

Our Product: Hands Off:

- Hands Off is an app created to teach users about cooking. Aimed primarily towards android users between the ages of 18 and 30, the app provides:
 - Step-by-step recipes in a slideshow format.
 - Informative videos teaching the user basic cooking techniques.
 - A platform on which to 'favourite', share and create recipes, as well as the ability to interact with other users.
- The Unique Selling Points (USP's) of this app are:
 - When following a recipe in the app, the user will be able to use minimal movement to switch from one step to the next, either through use of tapping the screen or possibly through gesture/motion recognition.
 - The app will have a paid version, where there will be no adverts, exclusive access to regularly changing competitions, and giveaways and discounts on cooking and food related products and experiences.
 - The app is therefore available in both a free and a paid version. The paid version will be advert free, whereas the free version will contain banner adverts and interstitial adverts before the first step in any recipe.

Cash Flow Forecast for the Development Phase of Hands Off: SWEng Group Three Enterprise Innovation (With Compound Interest, see Appendix D for the Forecast Without Interest):

Information: Cash Flow Forecast-SWEng Group Three Enterprise:

The following assumptions have been made to produce the Cash Flow Forecast:

- For calculating the wages:
 - As stated by the Project Manager, it is assumed employees will work on a more flexible schedule than previously described, more akin to zero-hour contracts, in order to ensure that deadlines are met. This is realistic, since our group is a start-up and so those who are employees will likely be more invested in the success of the product and enterprise than if they were to work for a larger company.
 - It is assumed that all employees have an initial month-long trial period, after which they are paid on a weekly basis (ie: all employees are paid from the week in which the first loan payment is received onwards).
- For loan interest calculations:
 - As per recommendation from the Financial Adviser, compound interest has been utilised.
 - A prudent view has been adopted for the size of the loan required. This
 means the amount needed has been over rather understated in order to cover
 possible unforeseen expenses.
- For calculating the financial value for the contracts:
 - It has been assumed that at this stage no code signing is necessary for the purchase and selling of contracts.
 - o It is assumed only two of the media will be bought-in/licensed.
 - It has been assumed that the app used as a reference uses all 6 forms of media described by the customer.
 - It is assumed the placement of the contract, the handover of the module code and the acceptance of the module by the purchaser group all occur between the deadline for all contracts to be agreed and filed and the first iteration (weeks of 26/2/2018, 5/3/2018 and 12/3/2018 respectively).
 - It is assumed the acceptance of the module by the purchaser group occurs in the week following the week in which the code is handed over.
 - It is assumed all contracts and payments are completed/made prior to the First Iteration deadline in week of 12/3/2018.
 - It is assumed the cost of buying/licensing the code for the other two media is equal to the value at which our company sells the code we create for two media to other groups, and hence not impacting the closing balance.
 - It is assumed the conversion rate used to convert the example price for the developer license of a typical multimedia app in Java and is accurate.
 - o It is assumed the cost of any code modules bought-in or licensed is the same.
- Other assumptions made include:
 - o The loan will be awarded.
 - The loan can be split into two payments in a ratio that is most beneficial for the group.
 - Rounding most numbers to the nearest penny is sufficiently accurate (and to four decimal places for the percentage of weekly interest used in the compound interest calculations).
 - o Interest is not an overhead.
 - The "app development" activity in the Work Breakdown Structure includes the time taken to write the code being sold to other groups/companies.

Information: Wages:

- The following information, courtesy of the Project Manager, was used to calculate the wages per job role per week.
- It is assumed that all employees, including the Project Manager, will work as software engineers in order to reduce the number of employees required, and to ensure that the product is created within the deadlines provided by the customer, however for the Work Breakdown Structure each employee has their own section, rather than the Work Breakdown Structure following a chronological approach, and so now there is no separate role for any of the following documents.
- Please note that the Work Plan is found in Appendix A, and the Gantt Chart in Appendix B.

Work Breakdown Structure:

Information: Contracts:

- Whilst the contracts values have no impact on the group's Cash Flow Forecast for the development phase of the app, in order to choose an accurate value I carried out online research and found an e-commerce app on Binpress [1] (See Appendix C for a hard copy of the webpage) that, whilst not being exactly the same as our product, comply with the requirements from the customer and was created for an Android platform in Java.
- The app's Developer License was \$499.99, and using the current currency conversion rates from USD to GBP, the Developer License was £384.34
- Using the previously mentioned assumption that the app's that we are using as a reference for pricing contracts utilises all 6 forms of media described by the customer:
 - $\circ \quad \frac{384.34}{6} = £64.05\dot{6} \text{ per form of media.}$
 - o Therefore, we believe the cost of licensing/buying-in two forms of media is

2(£64.056) = £128.113 = £128.11 (rounded to the nearest whole penny)

<u>Information: Interest and Estimated Loan Required:</u>

- Assuming, as mentioned previously, that compound interest is used, and using the 16.86%
 APR, the estimated loan required would be:
 - Closing Balance at the end of the development phase, without interest = £41,977.28 according to the cash flow forecast.
 - Closing Balance at the end of the development phase, with interest = £44,082.93 according to the cash flow forecast.
 - o Therefore, the estimated loan required would be £45,000.

This estimate has been rounded up to account for possible unforeseeable excess expenditure.

- Also, as mentioned in the assumptions section, it has been assumed that the ratio of the
 amounts of the loan paid can be changed in order to be most beneficial for the company,
 and so it's assumed that, for an estimate of £45,000, the loan's payments can be split into:
 - \circ £30,000 = the first loan payment.
 - o £15,000 = the second loan payment.
- The weekly interest percentage used in our cash flow forecast for the development phase is:
 - The formula used is:
 - Compound Interest Rate = $CIR = (1+r)^52 1 = 16.86\%$ (The CIR has been given.)
 - r = the weekly interest percentage.
 - o Therefore, $r = \sqrt[52]{(0.1686 + 1)} 1 = 0.003000771234 \dots = 0.30008\%$ (rounded to 5 decimal places.

Information: Overhead Recovery Rate Analysis:

• The following table shows our cumulative Overhead Recovery Rate forecast for the development phase of our product:

Week Commencing	Total Overheads (£)	Cumulative Total Overheads (£)	Direct Labour Hours	Cumulative Direct Labour Hours	Cumulative Overhead Recovery Rate (£ per Hour)
8/1/2018			No direct labou	r hours this week.	
15/1/2018	0.00	0.00	0	0.00	0.00
22/1/2018	0.00	0.00	173	173.00	0.00
29/1/2018	2,530.77	2,530.77	167	340.00	7.44
5/2/2018	0.00	2,530.77	82.65	422.65	5.99
12/2/2018	900.00	3,430.77	153.55	576.2	5.95
19/2/2018	1,898.08	5,328.85	136.55	712.75	7.48
26/2/2018	0.00	5,328.85	128.74	841.49	6.33
5/3/2018	0.00	5,328.85	111.37	952.86	5.59
12/3/2018	2,498.08	7,826.93	55	1007.86	7.77
19/3/2018	0.00	7,826.93	65	1072.86	7.30
26/3/2018	0.00	7,826.93	123.8	1196.66	6.54
2/4/2018	0.00	7,826.93	107.8	1304.46	6.00
9/4/2018	0.00	7,826.93	98.73	1403.19	5.58
16/4/2018	0.00	7,826.93	160.27	1563.46	5.01
23/4/2018	0.00	7,826.93	118.2	1681.66	4.65
30/4/2018	0.00	7,826.93	50	1731.66	4.52
7/5/2018	5,061.54	12,888.47	16	1747.66	7.37
14/5/2018	0.00	12,888.47	16	1763.66	7.31
21/5/2018	1,500.00	14,388.47	16	1779.66	8.08
28/5/2018	1,898.08	16,286.55	16	1795.66	9.07
4/6/2018	0.00	16,286.55	16	1811.66	8.99
11/6/2018	0.00	16,286.55	16	1827.66	8.91
18/6/2018	2,498.08	18,784.63	30	1857.66	10.11

• Therefore, it is clear that the Overhead Recovery Rate for our product remains below £11 per hour throughout product development.

Summary:

- We are SWEng Group Three (SG3) Enterprise, and our product Hands Off is an
 innovative app aimed towards young adults to provide them with recipes, cooking tips
 and exclusive deals, discounts and giveaways as well as the ability to complete
 recipes with minimal use of their hands.
- Our estimated loan required would be £45,000, preferably paid in the form of £30,000 in the first instalment and £15,000 in the second instalment.
