Confirmation of Technological Issues Document.

On the advice of Dr S. Porter (Date: 1/6/18), the following confirmation has been included:

This document confirms that Miranda Lowther, of Group 3 of the Software Engineering Module (ELE00005H) had significant issues with her computer when completing her user stories.

This resulted in a new laptop needing to be purchased (which arrived on 14/3/18).

In addition, she had multiple issues with Android Studio, it's SDK, emulator and Version Control, which began in March 2018 and continued throughout the rest of the module.
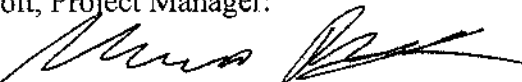

The combination of these issues and the problems related to her old computer in March had a significant impact on her efficiency in completing tasks related to the programming of this app.

Miranda Lowther, Finance Manager:

Signed: M. Lowther

Date: 6/06/18
