Sample Code

```
@Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
```

```
        toolbar = (Toolbar) findViewById(R.id.toolbar);
        setSupportActionBar(toolbar);

        cartDBAdapter = new CartDBAdapter(MainActivity.this);

        main_layout = (CoordinatorLayout) findViewById(R.id.main_layout);
        fragment_container = (FrameLayout) findViewById(R.id.main_container);
        drawer = (DrawerLayout) findViewById(R.id.drawer_layout);
        drawer_listview = (ExpandableListView) findViewById(R.id.drawer_listview);

        drawer.setScrimColor(Color.parseColor("#99D65369"));
        toggle = new ActionBarDrawerToggle(
                this, drawer, toolbar, R.string.navigation_drawer_open,
R.string.navigation_drawer_close) {
            @SuppressLint("NewApi")
            public void onDrawerSlide(View drawerView, float slideOffset) {
              /* Uncomment this code to have the sliding drawer push content to the side as
opposed to appearing on top of content*/
/*              float moveFactor = (drawer.getWidth() * slideOffset);

                if (Build.VERSION.SDK_INT >= Build.VERSION_CODES.HONEYCOMB) {
                    main_layout.setTranslationX(moveFactor);
                } else {
                    TranslateAnimation anim = new TranslateAnimation(lastTranslate, moveFactor,
0.0f, 0.0f);
                    anim.setDuration(0);
                    anim.setFillAfter(true);
                    main_layout.startAnimation(anim);

                    lastTranslate = moveFactor;
                }*/
            }
        };

        drawer.setDrawerListener(toggle);
        toggle.syncState();

        loadMainFragment();

        //Load Drawer Data
        expandableListDetail = DrawerData.getDrawerData();
        if (cartDBAdapter.getItemCount() > 0) {
            cart_item_count = cartDBAdapter.getItemCount();
        }

        badgeCount = cart_item_count;

        drawerTitles = new ArrayList<String>(expandableListDetail.keySet());
        draweListAdapter = new DrawerListAdapter(this, drawerTitles, expandableListDetail);
        drawer_listview.setAdapter(draweListAdapter);

        NavigationView navigationView = (NavigationView) findViewById(R.id.nav_view);
        navigationView.setNavigationItemSelectedListener(this);
    }
```

Benefits

1   2   3

TIME-SAVING   **COST EFFECTIVE**   **ADD / DELETE BENEFITS**

Tell visitors how your product will help them.

One benefit visitors might care about is how your product will save them time. Better yet, talk about something that's unique to your product.

Highlight how your product is cost effective compared to their current flows or competing solutions.

Your product could be cost-effective because it saves time or because it costs less than the competition. If it's more expensive, talk about how it's worth more, instead.

The format of each benefit is a Heading3 followed by paragraph text. You can format it however you like.

Add another one of these benefits by hitting enter at the very end of the text. To get rid of a benefit, remove its text and header, then hit delete.
